IDENTIFIERS Higher Education General Information Survey

ABSTRACT

Data from the annual Higher Education General Information Survey (HEGIS) on associate degrees and other formal awards below the baccalaureate level in institutions of higher education in the United States are presented. Completions of organized occupational curriculums in a variety of technologies normally offered in two-year collegiate programs designed to prepare students for immediate employment in a specific occupation or cluster of occupations are emphasized. Survey purpose, organization and methodology are discussed with two supplemental tables providing comparative data for the years 1970/71-1974/75. The bulk of the document is taken up by thirteen detailed tables displaying the data by length of curriculum, type of credit (creditable or not creditable toward a bachelor's degree), institutional control and type, sex of recipient, state, type of curriculum (arts and science or general programs, science- or engineering-related occupational programs, nonscience- and nonengineering-related occupational programs), discipline division and specialty. Appendices present seven of the thirteen tables aggregated on a different methodology as well as a reproduction of part of the survey form. (Author/LH)

HIGHLIGHTS

1. In 1974-75 there were 448,532 completions of sub-baccalaureate curriculums for which an associate degree or other formal recognition was given (an increase of 4.4 percent over 1973-74).

2. The number of associate degrees awarded during 1974-75:

   A total of 362,969, a 4.6-percent increase over 1973-74.
   For work wholly or chiefly creditable toward a bachelor's degree, 264,335; a 4.1-percent increase over 1973-74.
   For work not wholly or chiefly creditable toward a bachelor's degree, 98,634; a 5.7 percent increase over 1973-74.

3. The number of formal recognitions, other than associate degrees awarded during 1974-75:

   Total of 85,563, a 3.7-percent increase over 1973-74.
   In curriculums of 2- but less than 4-years duration, 25,153; a 10.5-percent increase over 1973-74.
   In curriculums of at least 1 year but less than 2-years duration, 60,410; a 1.1-percent increase over 1973-74.

4. A total of 277,161 associate degrees and other formal awards were conferred in 1974-75 in organized occupational curriculums (as compared to 260,508 in 1973-74), an increase of 6.4 percent.

5. In arts and science or general programs, not organized as occupational curriculums, 171,371 associate degrees and other formal awards were conferred in 1974-75, a gain of 1.3 percent from the 169,199 conferred in 1973-74.

6. By control of institution, proportions of the total sub-baccalaureate completions for 1974-75 were:

   Public—87.8 percent, as compared to 87.1 percent in 1973-74.
   Private—12.2 percent, as compared to 12.9 percent in 1973-74.

7. By sex of student, proportions of the total sub-baccalaureate completions for 1974-75 were:

   Men—52.0 percent, a decline from 53.2 percent in 1973-74.
   Women—48.0 percent, an increase from 46.8 percent in 1973-74.

8. Women received in 1974-75:

   47.1 percent of all associate degrees, as compared to 45.4 percent in 1973-74.
   49.7 percent of all awards in organized occupational curriculums, as compared to 48.8 percent in 1973-74.
   45.3 percent of all awards in arts and science or general programs, not organized as occupational curriculums, as compared to 43.6 percent in 1973-74.

9. By sex of student, the rates of increase from 1973-74 to 1974-75 for the total and sub-baccalaureate completions and for associate degrees conferred were:

   Total sub-baccalaureate completions—1.9 percent for men; 7.2 percent for women.
   Associate degrees conferred—1.2 percent for men; 8.6 percent for women.

FOREWORD

This report presents data from the annual survey by the National Center for Education Statistics (NCES) on associate degrees and other formal awards based on less than 4 years of college-level work in institutions of higher education in the United States. This report primarily emphasizes completions of organized occupational curriculums in a wide variety of technologies normally offered in 2-year collegiate programs designed to prepare students for immediate employment in a specific occupation or cluster of occupations.

Data for this report were obtained from the survey instrument "Degrees and Other Formal Awards Conferred" covering July 1, 1974, to June 30, 1975. This survey was part of the tenth annual Higher Education General Information Survey (HEGIS).

Tables in this report show data on associate degrees and other formal awards for programs of less than 4 years in length, by institutional control and type, sex of recipient, State, type of curriculum, and discipline division and specialty. Tables showing these data for each institutional unit are available in duplicated form only on written request to the University and College Surveys and Studies Branch

Information on baccalaureate and higher degrees is presented in a separate report entitled *Earned Degrees Conferred, 1974-75, Summary Data.*

The cooperation of the college and university officials who supplied the institutional reports has made possible a response rate of nearly 100 percent. Only three institutional units were unable to supply the necessary information. The continued efforts and interest of the survey respondents and the State coordinators are deeply appreciated.

Marjorie O. Chandler, Acting Director
Division of Postsecondary and
Vocational Education Statistics

Paul F. Mertins
University and College Surveys
and Studies Branch

ACKNOWLEDGMENTS

The preparation of a publication of this type is the result of months of work by many different people within the National Center for Education Statistics. While not all can be mentioned by name, three are of particular importance:

Geneva C. Davis, Statistical Assistant, did much of the checking of tables for completeness and accuracy.

Linda D. Barry and Mary A. Gilbert, typists, put the manuscript in order.

7.–Associate degrees and other awards, by length of curriculum, type of credit, type of award, and sex of student and by type of curriculum, curriculum category, and division: Aggregate United States, 1974-75 . . 17

8.–Associate degrees and other awards, by length of curriculum, type of credit, type of award, and sex of student and by type of curriculum and curriculum category, division, and specialty: Aggregate United States, 1974-75 18

9.–Associate degrees and other awards in arts and science or general programs, by length of curriculum, type of credit, type of award, sex of student, and control and level of institution: Aggregate United States, 1974-75 19

10.–Associate degrees and other awards in arts and science or general programs, by length of curriculum, type of credit, type of award, sex of student, and State or other area: Aggregate United States, 1974-75 20

11.–Associate degrees and other awards in science- or engineering-related organized occupational curriculums, by length of curriculum, type of credit, type of award, sex of student, and control and level of institution: Aggregate United States, 1974-75 21

12.–Associate degrees and other awards in nonscience- or nonengineering-related organized occupational curriculums, by length of curriculum, type of credit, type of award, sex of student, and control and level of institution: Aggregate United States 1974-75 21

13.–Associate degrees and other awards, by control and level of institution, length of curriculum, type of credit, and State or other area: Aggregate United States, 1974-75 22

Appendix tables

101.–Associate degrees and other awards, by length of curriculum, type of credit, type of award, sex of student, and control and level of institution: Aggregate United States, 1974-75 30

103.–Associate degrees conferred, by type of credit, sex of student, and control and level of institution: Aggregate United States, 1974-75 30

105.–Associate degrees and other awards, by type of curriculum, curriculum category and division, type of award, length of curriculum, and control and level of institution: Aggregate United States, 1974-75 . . . 31

109.–Associate degrees and other awards in arts and science or general programs, by length of curriculum, type of credit, type of award, sex of student, and control and level of institution: Aggregate United States, 1974-75 32

111.–Associate degrees and other awards in science- or engineering-related organized occupational curriculums, by length of curriculum, type of credit, type of award, sex of student, and control and level of institution: Aggregate United States, 1974-75 33

112.–Associate degrees and other awards in nonscience- or nonengineering-related organized occupational curriculums, by length of curriculum, type of credit, type of award, sex of student, and control and level of institution: Aggregate United States, 1974-75 33

113.–Associate degrees and other awards, by control and level of institution, length of curriculum, type of credit, and State or other area: Aggregate United States, 1974-75 34

PURPOSE OF THE SURVEY

Associate Degrees and Other Formal Awards Below the Baccalaureate reports a portion of the output of higher education programs at a specific point in time. The survey includes all degrees and awards below the baccalaureate, granted by institutions of higher education in the aggregate United States, that are identified by the *Education Directory, Higher Education, 1973-74* (DHEW Publication No. (OE) 74-11404) as providing at least 2 years of college-level work. As such, these data constitute the national source of information on the supply of trained manpower being developed in a large number of organized occupational curriculums that are designed to prepare students for immediate employment. The information is needed for manpower planning at local, State, regional, and Federal levels.

The data in this publication, used in conjunction with that from earlier reports, provide for studies of trends in numbers of associate degrees and other awards in various discipline specialties, as well as distributions by sex, geographic area, and type of institution.

SURVEY ORGANIZATION AND METHODOLOGY

SURVEY UNIVERSE

The institutional units included here constitute all those in the universe of the National Center for Education Statistics (NCES) that could be determined as offering programs requiring at least 2 years of college-level work, but less than 4 years, during the period from July 1, 1974, to June 30, 1975. (An institutional unit is a separately organized unit, either a separate institution or part of a multicampus institution.) The survey universe for 1974-75 is based on the list of institutional units included in the *Education Directory, Higher Education, 1973-74* (DHEW Publication No. (OE) 74-11404) with such changes as were known to NCES in the fall of 1974.

MAJOR CLASSIFICATIONS OF DATA

Degrees and Awards

The higher education degrees and awards below the baccalaureate, for which the survey requested data, are defined as follows:

Associate Degree–Requires successful completion of at least 2 but less than 4 years of work beyond secondary school. The survey instrument distinguishes between associate degree curriculums representing work that is wholly or chiefly creditable toward a bachelor's degree and those representing work that is not wholly or chiefly so creditable.

Other Formal Award–Requires at least 1 year of work beyond secondary school. In the survey instrument, data are collected separately for those awards for curriculums of 2 but less than 4 years and those for curriculums of at least 1 but less than 2 years.

Type of Control

Institutional units were identified as either "public" or "private" according to their classification in the *Education Directory, Higher Education, 1973-74* (DHEW Publication No. (OE) 74-11404), with such changes as were known to NCES in the fall of 1974.

Types of Institutions

Selected tables in this report group institutional units into three categories:

Universities—institutional units that give considerable stress to graduate instruction, confer advanced as well as bachelor's degrees in a variety of liberal arts fields, and have at least two professional schools not exclusively technological.

Other 4-year institutions—other institutional units offering 4 or more years of college-level work, but not meeting the criteria for classification as universities.

Two-year institutions—institutional units which offer at least 2 years of college-level work, but less than 4 years.

Curriculum Category and Division

Three categories of curriculums are identified in this report:

1. Arts and science or general programs not organized as occupational curriculums.
2. Science-related or engineering-related organized occupational curriculums, consisting of four divisions:
   Data processing technologies
   Health services and paramedical technologies
   Mechanical and engineering technologies
   Natural science technologies
3. Nonscience- and nonengineering-related organized occupational curriculums, consisting of two divisions:
   Business and commerce technologies
   Public service-related technologies

Discipline Specialty (major field of study)

The classification of discipline specialties relies on *A Taxonomy of Instructional Programs in Higher Education.** This was adopted by HEGIS in 1970 and is maintained to provide comparability of data on a continuing basis.

*U.S. Department of Health, Education, and Welfare, Office of Education, National Center for Education Statistics, *A Taxonomy of Instructional Programs in Higher Education.* By Robert A. Huff and Marjorie O. Chandler. OE-50064-70. Washington: U.S. Government Printing Office, 1970.

DATA COLLECTION

A copy of the survey form, accompanying instructions, and definitions** were addressed to the president of each institutional unit listed in the survey universe, or, in more than one-half of the States, to a State coordinator who supplied the data from information submitted by the institutional units or coordinated the data collection with all or selected institutional units in the State. Followup letters and phone calls were made to State coordinators or institutional officials whose data were not received within a reasonable period of time after the due date of August 15 in the survey year.

DATA VERIFICATION

Three methods were utilized to verify the reasonableness of data submitted by each institutional unit:

1. A computer check for field-by-field comparison with the data submitted for the previous year was made. This procedure checked to determine whether the data varied by more than a predetermined percentage from the previous year's submission. The acceptable difference was based on the order of magnitude of the data field size: the greater the number of degrees, the lower the percentage of difference accepted.
2. Survey forms containing data items rejected by the computer check were examined visually by survey personnel to determine whether footnotes, explanatory notes, or readily recognizable human errors accounted for the apparent discrepancies. Where necessary, catalogs of the institutions were consulted for institutional offerings.
3. Finally, the remaining discrepancies were resolved by correspondence or telephone contact with State coordinators and institutional representatives.

Internal checks for consistency included the checking of accumulated totals against subtotals obtained from appropriate subsets of the data.

**See appendix B.

CURRENT DATA AND RECENT TRENDS

The number of completions at the sub-baccalaureate level continues to increase, but the distribution by program shows considerable change. Table A shows the number of completions by curriculum category for each year from 1970-71 through 1974-75, with the percentage change between 1973-74 and 1974-75 and between 1970-71 and 1974-75. While completions in arts and science or general programs, not organized as

occupational curriculums, increased 14.3 percent during the period 1970-71 to 1974-75, completions in organized occupational curriculums rose much faster: science- or engineering-related curriculums increased 81.2 percent and nonscience- and nonengineering-related curriculums increased 79.6 percent. As a result (see tabulation below) the completions in arts and science or general programs declined from 49.4 percent of these sub-baccalaureate completions to 38.2 percent, while each of the two occupational areas increased its percentage of the total.

Table B shows the completions in each of the 6 divisions of the organized occupational curriculums. In all but one of these the increase in the number of completions was at least 50 percent from 1970-71 to 1974-75. The lone exception was data processing technologies which declined by 9.8 percent. There are no data available to determine why this might have happened. Data processing, general, was the specialty which constituted most of this division. Whether these programs were emphasizing the use of key punching and electromechanical data processing equipment at the time more complex computers had come into prominence or whether students had increasingly enrolled in trade-school programs rather than in collegiate programs is unknown. This decline was in distinct contrast to the increasing numbers of degrees awarded at the bachelor's level in computer science.*

*See *Earned Degrees Conferred, 1974-75, Summary Data.*

Curriculum category	1970-71	1971-72	1972-73	1973-74	1974-75
	(Completions in percent)				
Not occupational:					
Arts and science or general programs	49.4	46.0	42.4	39.4	38.2
Occupational:					
Science- or engineering-related	28.9	30.6	33.4	34.3	35.4
Nonscience- and nonengineering-related	21.7	23.3	24.2	26.4	26.4

Table A.--Completions at the sub-baccalaureate level, by curriculum category: Aggregate United States, 1970-71 to 1974-75[1]

Curriculum category	1970-71	1971-72	1972-73	1973-74	1974-75	Percent change	
						1973-74 to 1974-75	1970-71 to 1974-75
Not occupational:							
Arts and science or general programs	149,885	161,824	165,008	169,199	171,371	1.3	14.3
Occupational:							
Science- or engineering-related	87,728	107,496	129,917	147,268	158,956	7.9	81.2
Nonscience- and nonengineering-related	65,821	82,093	94,039	113,240	118,205	4.4	79.6
Total completions	303,434	351,863	388,964	429,707	448,532	4.4	47.8

[1] In 1972-73 and earlier years, data were collected separately for programs *below* the technical or semiprofessional level; these programs, few in number, were eliminated in 1973-74 and later surveys. For purposes of consistency in this table, data which had been collected for these programs have been eliminated in the above totals for 1970-71, 1971-72, and 1972-73.

PRESENTATION AND COMPARABILITY OF THE DATA

TABLES

The 13 basic tables in this report contain what the authors believe to be the most comprehensive and useful groupings of the data within the constraints of publication. The tables are comparable to previous years' reports, although in a different order when compared to years prior to 1972-73.

Table B.--Completions at the sub-baccalaureate level, by occupational curriculum category and division: Aggregate United States, 1970-71 to 1974-75

Occupational curriculum category and division	1970-71	1971-72	1972-73	1973-74	1974-75	Percent change	
						1973-74 to 1974-75	1970-71 to 1974-75
Science- or engineering-related	87,728	107,946	129,917	147,268	158,956	7.9	81.2
Data processing technologies	8,745	8,971	8,488	7,968	7,886	−1.0	−9.8
Health service technologies	34,518	45,412	58,944	70,325	76,720	9.1	122.3
Mechanical and engineering technologies	37,437	44,145	48,515	52,559	56,303	7.1	50.4
Natural science technologies	7,028	9,418	13,970	16,416	18,047	9.9	156.8
Nonscience and nonengineering-related	65,821	82,093	94,039	113,240	118,205	4.4	79.6
Business and commerce technologies	51,037	61,077	66,721	80,486	82,987	3.1	62.6
Public service-related technologies	14,784	21,016	27,318	32,754	35,218	7.5	138.2
Total occupational completions	153,549	190,039	223,956	260,508	277,161	6.4	80.5

Tables 1 and 2 contain summary data for associate degrees and other awards, combined by level and type of curriculum. Table 1 presents these data by control and level of institution; table 2 presents them by State or other area.

Tables 3 and 4 show summary data for associate degrees only, by type of credit (work wholly or chiefly creditable toward a bachelor's degree and work that is not). Table 3 presents these data by control and level of institution; table 4 presents them by State or other area.

Tables 5 and 6 present data for associate degrees and other awards, by type, level, and length of curriculum, type of award, and curriculum category. Table 5 shows these data by control and level of institution; table 6 presents them by State or other area.

Tables 7 and 8 show summary data or associate degrees and other awards, by length and type of curriculum, type of award, and curriculum category. Table 7 presents these data by curriculum division; table 8 presents them by curriculum division and specialty.

Tables 9 and 10 are concerned with arts and science or general programs (not organized as occupational curriculums). Table 9 presents these data by control and level of institution; table 10 presents them by State or other area.

Tables 11 and 12 present summaries of associate degrees and other awards, by control and level of institution and by curriculum division and specialty. Table 11 summarizes the data for science- or engineering-related organized occupational curriculums; table 12 summarizes the data for nonscience- and nonengineering-related organized occupational curriculums.

Table 13 has data by State or other area for associate degrees and other awards, classified by control and level of institution and by length of curriculum. Data are combined by level and type of curriculum.

Because the order of tables was changed with the 1972-73 report, and the method of aggregation with the current report, the comparison tabulation below may be helpful.

Table number in 1974-75	Table Number in 1972-73 and 1973-74	Table Number in 1970-71 and 1971-72
1	101	--
2	2	2
3	103	--
4	4	8
5	105	--
6	6	14
7	7	10
8	8	15
9	109	--
10	10	18
11	111	--
12	112	--
13	113	--

Tables that show the numbers of degrees and awards by discipline specialty and by institutional unit are not being published this year.

Computer Tapes

Persons interested in making additional groupings or analyses of the data may secure a computer tape (approximate cost $94.00 or $120.00 depending on density) containing all data used in the preparation of this report. Information on the tapes may be obtained from:

Robert A. Heintze
Division of Statistical Services
National Center for Education Statistics
FOB 6, Room 3036
400 Maryland Ave. SW.
Washington, D.C. 20202

Comparability of Data

In terms of curriculum divisions and specialties the survey collecting data for this report continues to utilize the classification of fields of study published in *A Taxonomy of Instructional Programs in Higher Education* (OE-50064). The taxonomy was reprinted in the 1970-71 edition of this report. The introduction of the new field classification system means that any comparisons with data prior to 1970-71 should be made with particular care. A degree of comparability is possible through the use of the translation table included with the taxonomy. However, the additions of new fields, together with changed distributions and descriptions of fields formerly included, changed the classification base to such an extent that in many cases significant comparisons are impossible.

Another change occurred between 1972-73 and 1973-74. Beginning with the latter report, data were no longer collected on programs *below* the technical or semiprofessional level. This means that comparisons between 1973-74 data and those of later years with those of 1972-73 and earlier years must allow for this difference.

DETAIL TABLES

TABLE 1.—ASSOCIATE DEGREES AND OTHER AWARDS, BY LENGTH OF CURRICULUM, TYPE OF CREDIT, TYPE OF AWARD, SEX OF STUDENT, AND CONTROL AND LEVEL OF INSTITUTION: AGGREGATE OF THE STATES, 1974-75

CONTROL AND LEVEL OF INSTITUTION	CURRICULUMS OF AT LEAST 2 BUT LESS THAN 4 YEARS										CURRICULUMS OF AT LEAST 1 BUT LESS THAN 2 YEARS

APPENDIXES

A. An Alternate Method of Aggregation of Institutional Data

B. Reproduction of Survey Form, Part C

Appendix A

AN ALTERNATE METHOD OF AGGREGATION OF INSTITUTIONAL DATA

Recognizing that increasing numbers of multicampus institutions are composed of various units offering programs at different levels, the National Center for Education Statistics began in 1972 a system of identifying the level of program in each of the units separately rather than for the multicampus institution as a whole. The program levels remain the traditional ones: university, other 4-year, and 2-year. The new method of aggregating data according to the program level of each reporting unit makes it possible to group 2-year branches of multicampus universities and 2-year branches of other 4-year institutions with the independent 2-year institutions (rather than with the parent institution). In similar fashion, "other 4-year" branches of multicampus universities can be grouped with independent "other 4-year" institutions. This new method provides a count of all reporting units (whether branches or independent institutions) and classifies each of the units according to its own program level. The homogeneous groupings provided by this treatment of institutional data are essential for many types of operations analysis and institutional comparisons.

The new method of aggregation of data for *Associate Degrees and Other Formal Awards Below the Baccalaureate* was first presented in the appendix tables of the 1972-73 and 1973-74 publication. Each institutional unit is now coded in one of six ways:

1. University (including only those branches classified at the university level);
2. Other 4-year institution (including only those branches classified at the other 4-year level);
3. 2-year institution (including only its own branches);
4. 4-year branch of a university;
5. 2-year branch of a university;
6. 2-year branch of "other 4-year" institution

Using the "old" method of aggregation (the one used in the appendix tables in this publication), institutional units aggregate as follows:

University = 1 + 4 + 5;
Other 4-year = 2 + 6;
2-year = 3.

The "new" method of aggregation (used in the main tables in this publication) is as follows:

University = 1;
Other 4-year = 2 + 4;
2-year = 3 + 5 + 6.

The general impact of the "new" method of aggregation is to reduce the number of students shown as receiving degrees and awards below the baccalaureate from universities. The following tabulation for the aggregate United States, 1974-75, summarizes the general impact of changing the method of aggregation.

Level of institution	Total number of associate degrees and other formal awards	
	Old method of aggregation	New method of aggregation
Part 1—Publicly controlled		
Universities	24,764	14,462
Other 4-year institutions	17,311	20,163
2-year institutions	351,615	359,065
Part 2—Privately controlled		
Universities	4,111	4,064
Other 4-year institutions .	20,515	20,009
2-year institutions	30,216	30,769

To simplify comparisons between the two methods, a consistent numbering system is used. The tables in this publication that are aggregated by the "old" method have 100 added to the number used for the tables aggregating the same data by the "new" method. See tables 101, 103, 105, 109, 111, 112, 113, which follow.
